1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to apparatus, classified in class 338, subclass 60.
 - II. Claim 5, drawn to apparatus, classified in class 324, subclass 76.11.
 - III. Claim 6, drawn to method, classified in class 29, subclass 610.1.
2. The inventions are distinct, each from the other because:

Inventions I and II in a first set and III in a second set are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as a plurality of distinct products as disclosed by claims 1, 3 and 5.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require

an amplifier and an AC voltage measurement circuit coupled to the amplifier output as detailed in claim 5. The subcombination has separate utility that does not require a second metallic conductor formed on the insulating substrate disposed adjacent to at least a part of the second resistor as detailed in claim 3.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification in addition to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Upon the election of Invention I, further election of species is required as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention:

- (a) The species according to Figure 1.
- (b) The species according to Figure 3.
- (c) The species according to Figure 4.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim *appears* to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2829

6. A telephone call was made to the Office of the Attorney of Record on April 26, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. A shortened statutory period for response to this action is set to expire one month(s) from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
